SUMMARY

B.E. Information Science graduate with a strong foundation in Generative AI, Machine Learning, and software development. Experienced in building projects and AI applications using LLMs, RAG, Agentic AI, APIs, and full-stack technologies. Completed an AI Internship with hands-on experience in developing intelligent solutions.

EDUCATION

2022-2026	BE-Information Science	East West Institute of Technology, Bangalore	8.41/10 CGPA
2020-2022	Pre-University (PCMB)	PES PU College, Shivamogga	
2019-2020	10 th State Board	V E S, Ajjampura	

SKILLS

- **Programming Languages:** Python, Java, C
- **AI/ML & Data Science:** Machine Learning, Deep Learning, NLP
- **Generative AI:** LLMs, RAG, Prompt Engineering, LangChain, Agentic AI
- **Web Technologies:** HTML, CSS, JavaScript, Bootstrap
- **Data Visualization:** Power BI, Tableau
- **Databases:** MySQL, MongoDB
- **Soft Skills:** Communication, Teamwork, Leadership, Time Management

PROJECTS & EXPERIENCE

- **AI Intern – Glowlogics Solutions:** Worked on real-world AI use cases using Python, Machine Learning, Deep Learning, and APIs, contributing to the development and validation of AI-driven solutions and automation workflows, while gaining hands-on experience in Data Science, ML Models and AI projects.
- **Smart CPR Glove –** Developed a wearable ESP32-based smart glove with biomedical sensors for CPR assistance (accuracy-80%) ,providing real-time feedback via buzzer and LCD. Integrated an air pump for automated chest compressions and implemented emergency alerts with location sharing via Telegram.
- **TravelEase:** Developed a Java and MySQL-based travel management system to handle bookings, customer details, hotels and tour packages with efficient database operations
- **RAG Chatbot:** Developed an AI-powered PDF chatbot using RAG to answer queries directly from document content. Integrated semantic search, conversational memory, and multi-PDF support for accuracy and usability.
- **SmartFeedback AI:** An Agentic AI system that automatically analyzes user feedback from multiple sources and generates structured, prioritized tickets through an interactive web dashboard.
- **StorySphere-AI:** Developed a multilingual storytelling web application using Streamlit and OpenAI for story generation, real-time translation, text-to-speech, and AI image generation.
- **Machine Learning & Data Science Projects:** Developed ML models using real-world datasets, applying data preprocessing, feature engineering, and model evaluation techniques to generate actionable insights.

CERTIFICATIONS

- Python programming Expert & Python for Data Science Professional -**Edureka (2025)**
- Web programming and Technologies, Java Programming- **Ethnotech (2025)**
- LLM with Prompt Engineering & Agentic AI -**Edureka (2026)**
- C Programming -**Infosys SpringBoard (2024)**
- Artificial Intelligence & Open AI - **Edureka (2026)**

ACHIEVEMENTS & ACTIVITIES

- Certified participant of the National Conference on Recent Innovations (NCRIE) held at KSIT College.
- Presented projects at College Project Expo (2024 & 2025), showcasing innovative solutions
- Published a project journal paper in IJSREM. Gained experience in research and technical writing.
- Coordinated cultural, technical, and farewell events, managing planning, execution, and teamwork while demonstrating leadership skills
